Design Choices: Simple clean my course page (shopping cart page) where users can see the list of course that are added to their schedule, what time they selected, and where it is located. Users also have the ability to drop courses from this page.

The selection process for the course description page was also altered to give more feedback. Users can now select multiple sections that they would like to see in their calendar. The page updates with information about which sections they are registered for and the times and locations
